- E-mail forms with anti-spam filters
- News and RSS Feed
- Web 2.0 ready
- Video, Sound and Flash™ Animations
- Embedded content
- Reserved Areas with secure login and password
- Multi-language websites

#### A website in 5 steps:

The WebSite X5 secret is that it doesn't force you to waste time learning complex software, you just follow 5 steps. Each step has been custom designed to make it easy to get truly professional results with the minimum of fuss. There's no need to pay a website design company when you have WebSite X5. Now you can become a website guru!

#### 1. Choose your Design

With over 1,400 templates, you'll be spoilt for choice when it comes to deciding on the look of your website. Each template has been professionally designed and is easily customisable to make your website unique, all without the fuss of having to learn to be a graphic designer. Even power users can benefit from WebSite X5. It's the perfect tool for quickly creating professional website templates before making use of the built-in image, table, text effects and HTML editors. WebSite X5 even provides for the creation of an unlimited number of pages and an unlimited number of websites!

#### 2. Layout your Website

WebSite X5 is designed to cope with everything from a single 'hello world' web page, to a complex site filled with hundreds of highly detailed pages. The intelligent website layout features make organising your site simple. Group similar pages into one of four levels, these are then automatically converted into the website menus. WebSite X5 also intelligently manages your website. Features such as the automatic sitemap generator makes your website easy to use for visitors and easy for Internet search engines to find.

#### 3. Enter your Content

WebSite X5 includes a unique content entry system. The object palette supplies intelligent tools for entering every type of web page content - words, pictures, tables, animations, video, slide shows and much more. The content layout tool divides each page into content zones, onto which you drag and drop your choice of content from the object palette. WebSite X5 lets you create even the most complex of page layouts with just a few clicks.

#### 4. Select your Advanced Features

WebSite X5 is second to none when it comes to the ease with which advanced features can be added to your website. Whether you need blogs and podcasts, a members' area or a full e-commerce system (including the ability to take credit card payments), it is all at your fingertips. WebSite X5 is fully equipped to attract worldwide visitors with its multi-language welcome page and one-click Social Network submission function.

#### 5. Put your site on the Internet

Once you have finished creating your website, the final step is to send it to the Internet. Using any web space, the built-in ftp engine makes it child's play to publish your website. But it doesn't stop there; whenever you want to update your website (for example by adding a news item), WebSite X5 intelligently sends just the updates to the web space.

- No programming experience required
- Drag 'n' drop user interface
- Includes tutorials and manuals to assist users of all levels
- Add videos, audio and Flash™ animations
- HTML expert? Write your own code at the touch of a button
- Upload your completed website and keep it up to date all the time

#### 25 Words

WebSite X5 is the outstanding tool that helps turn your website dreams into reality. It's packed with advanced tools to help you create professional websites.

#### 40 Words

WebSite X5 is the outstanding tool that helps turn your website dreams into reality. It's packed with advanced tools to help you create professional websites with all of the eye-catching features you see on the web's very best sites.

#### 150 Words

WebSite X5 is an all-in-one solution packed with tools to create and publish professional websites, online shops and blogs in just 5 easy steps. WebSite X5 is designed to work like a wizard, visually guiding users through the steps to create and publish a complete, functional and professional website.

WebSite X5's templates design the page - all users need to do is drag and drop objects to create pages. With a selection of website objects to choose from including videos (with support for YouTube™), image galleries, integrated e-commerce with partners such as PayPal™, podcast and RSS content and Shockwave™ Flash animations – creating a professional website could not be easier.

WebSite X5 generates all the programming code, connects to the service provider and uploads the website. X5's advantage is that users do not require any previous experience in Web Development, Programming or Design to use the software and create a website.

#### 250 Words

WebSite X5 is an all-in-one solution packed with tools to create and publish professional websites, online shops and blogs in just 5 easy steps. WebSite X5 is designed to work like a wizard, visually guiding users through the steps to create and publish a complete, functional and professional website. No programming skills required!

WebSite X5's templates design the page - all users need to do is drag and drop objects to create pages. With a selection of website objects to choose from including videos (with support for YouTube™), image galleries, integrated e-commerce with partners such as PayPal™, podcast and RSS content, plus video and Shockwave™ Flash animations - creating a professional website could not be easier.

WebSite X5 includes many great tools such as built in Image Editor, making it unnecessary to use external graphic programs. With the Automatic Image Compressor images are automatically compressed and resized for the Internet - no need for any external image optimization. WebSite X5 is the perfect answer for in-house web design.

WebSite X5 generates all the programming code, connects to the service provider and uploads the finished website in minutes. X5's advantage is that users do not require any previous experience in Web Development, Programming or Design to use the software and create a website. However, users who are more experienced can just as easily use their skills. At the end, WebSite X5 allows users to publish a project directly on the Internet, without using external FTP programs (File Transfer Protocol).

### WebSite X5 EVOLUTION 8

**The easiest way to create professional websites, blogs and webshops.**

WebSite X5 is the outstanding tool that helps turn your website dreams into reality. It's packed with advanced tools to help you create professional websites with all of the eye-catching features you see on the web's very best sites.

### 390 Words

WebSite X5 is designed to work like a wizard, visually guiding users through the steps to create and publish a complete, functional and professional website. No programming skills required!

WebSite X5 is an all-in-one solution packed with tools to create and publish professional websites, online shops and blogs in just 5 easy steps:

1. Choose website design, select from one of the 1,400 templates from within the software or a unique design either by modifying one of the pre-designed templates or create from scratch
2. Layout the website, decide on what information needs to be presented
3. Enter the content, using the drag 'n' drop interface to add the words, images, sounds, videos and much more
4. Select the advanced features to be included; Online Shop, Blogs, RSS feeds, Reserved Areas, Multi-language Welcome Pages
5. Put the website on the Internet using the built FTP tool

WebSite X5 helps at every stage, every step is accompanied by intelligent advice to show just what is required to turn an idea in to an eye-catching website. All the power users need with none of the confusion of complex programs.

WebSite X5's templates design the page - all users need to do is drag and drop objects to create pages.
